

FUN2GO

Double rider cycle

The Fun2Go is a double rider cycle/ three-wheel tandem in which the users sit beside each other. One person steers, both can pedal. The two persons have a good view and can communicate well with each other due to the seats being next to each other. The riders can get on without having to step through and the seats can be easily adjusted to the required distance with a lever. The Fun2Go is enormous manoeuvrable, with two wheels completely in the rear and one fore-wheel it can be rotated round its own axis. The optional freewheel switch can be turned on or off to determine whether the rider (if mandatory) would pedal along. There is an optional electric engine to give power assist to help you cycle easily under any circumstances.

SUITABLE FOR:

Two people of which one can't participate independently in traffic (anymore). The Fun2Go is widely used by institutions, homes and individuals.
