The World's First Internet-Based AAC System!

Alexicom AAC “on-the-go”

Alexicom AAC is a free iPad app that gives the user the ability to spontaneously generate new communication “on-the-go” when internet access may be limited or unavailable. While the app is intended to support our internet-based AAC services, its generative features provide the user with enough powerful tools that it can be used as a free limited stand alone AAC system.

New free features include (as an iPad app):

- Ability to create speaking, linking pages that never expire
- Camera image acquisition directly in the cells
- In-app page creation and editing absolutely free
- Text-to-speech
- Word prediction with 150k word dictionary
- Optional word learning and tracking of frequency of word use
- Auto-scan and step-scanning
- Bluetooth switch and direct touch scanning
- Sequential and row/column scanning
- Auditory scanning
- Pitch/voice changes
- 32 demo pages
- Works anywhere at any time

Enhanced features (as part of paid services):

- Use on multiple devices at once
- 11 pre-made page sets
- 1200+ pre-made pages
- 7000+ searchable images
- Page sets with verb conjugation & plurals
- AT&T Natural Voices in 5 languages
- Enhanced editing features like move, copy & swap
- Enhanced editing features like insert row or column
- Remote page editing and creation
- Multiple party page editing
- Unlimited automatic server backup
- Immediate access to any future updates, abilities, and page sets
- Use on all your devices (iOS, PC, Mac, Android)
- Administrative and IT control/review abilities
- Private library groups
- Unlimited online and telephone tech support
