

Interact-AS™

Private and Secure Captioning and Speech Generation

One of Auditory Sciences many products for removing communication barriers.

The only product that allows you to truly Interact

Features:

- Supports written, typed and spoken input.
- Spoken words are instantly transcribed and displayed.
- The transcript includes a synchronized audio recording. You can easily replay what was being said when that portion of the transcript was generated.
- Written or typed words are instantly spoken aloud so a non-verbal person can participate in meetings and discussions.
- Use the Visualize feature to sketch ideas or make notations on pictures.
- Optional language modules instantly translate conversations

System Requirements:

- Microsoft's Windows 10 OS.
- 4 GB or more of RAM.
- An Intel i5 or faster CPU is recommended.
- At least 3 GB available disk space.
- An external microphone such as a wireless FM system is recommended.

Private and Secure Captioning

Interact-AS™ was initially developed in partnership with the U.S. Marine Corps, who needed a secure captioning and translation system for use in battlefield situations. This system is now available to everyone. You can use this proven technology to caption and translate your own conversations and meetings, and be confident that your data is private and secure.

Multiple Communication Barriers

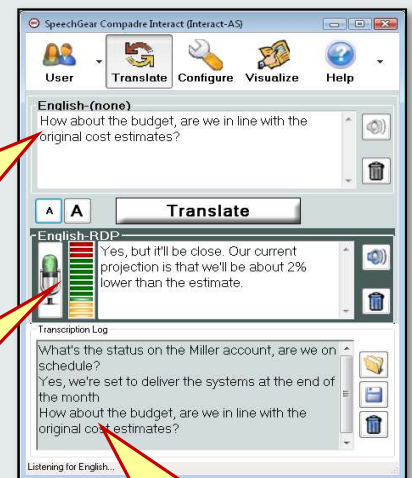

- Individuals who are **Deaf** are directly communicating with people who do not know sign language.
- Employees that are **Hard-of-Hearing** use Interact-AS to caption conversations, conference room discussions, and videos.
- Individuals that have **difficulty speaking** use Interact-AS to voice whatever they write or type.
- With the optional Language Modules, Interact-AS **removes language barriers** by instantly translating conversations.

Use speech, typing or handwriting

The most recent sentence is displayed here, plus words you type or write are spoken aloud

Speech, typing or handwriting from others is formatted and instantly displayed

A transcript and optional voice recording of the entire conversation can be saved for future reference

Simple to Use...

Interact-AS™ is a complete standalone system. You do not need a connection to the Internet.

... With Advanced Features

Save a copy of your transcript. Use the built in *PhaseBuilder™* features to quickly generate speech. Add your own vocabulary to your dictionary. And even more. You are perhaps familiar with the saying, *a picture is worth a thousand words*. Interact-AS puts this into practice. Use the *Visualize* tab to show pictures or video clips that add to your communications – perhaps a presentation, a website, a document, or a product description. Pull up a sketch pad where you can draw and discuss ideas. These are just a few of Interact's many features.

Start Interacting Today

Interact-AS™ is affordable, simple to use, with features to ensure all your communication needs are being met. It meets ADA regulations, is 504 and 508 compliant.
