Manual height adjustment

Thera Gas/150  
Gas spring height adjustment

Thera El/150  
Electrical height adjustment

Thera Double/130  
Electrical height adjustment  
and electrical leg spreading

Thera Extra/240  
Max. capacity up to 240kg

## Primary application

Home care  
Institutional  
Hospital

The Thera Walking Table programme consists of a series of safe and stable ambulatory devices.

They are designed to support the weight of the user when gait training in a physio or rehab situation, or in a post operative situation by encouraging early patient mobility.

These walking tables can be used independently or with assisted care. They are easily height adjusted to accommodate users of different heights.

The range consists of 5 models.

## Key features:

- Rear braked wheels
- Width adjustable arm padding and handgrips
- Manual, gas or electrical height adjustment
- Stable non-tip base
- Maximum weight capacity of 130, 150 or 240 kg

## Accessories:

- Dual hand brakes
- Side support
- Foot plate
- Dripstand holder

Dual hand brakes accessory.

Multi adjustable handles to suit varying needs. Width adjustable armpads.

Thera Extra: Double columns for increased bariatric stability.

Thera Gas: Easy height adjustability using the gas spring release lever.

Thera Double has electrical leg spreading for extra space around the client.
