Streamer™

Private and Secure Captioning, Note-Taking, Speech-Generation and Translation

Streamer™

Captioning, Note-taking and Translation. Done Right!

Features:

- Easy to use. Simply go to **www.streamer.center** and login.
- Fully compliant with privacy and data regulations.
- Runs on MacBooks, iPads, iPhones, Android Phones, Chromebooks, laptops and more.
- Spoken words are instantly transcribed using full context and complete punctuation.
- Multi-lingual instant voice-to-voice translation of conversations.
- You control when the transcript is being generated, who sees that transcript, and who can take a copy home with them.
- Transcript files are saved in your choice of multiple formats.
- Drag-and-Drop sharing of documents and images.

System Requirements:

- Any device that uses a browser to connect to the Internet.
- An external microphone is recommended, such as a headset, lapel, tabletop or handheld mic.

How Streamer™ Works

Streamer™ is a private and secure captioning, note-taking, speech-generation, and translation system that you can use as often as you like to communicate with as many people as you want. There are no apps to download, invite codes to share, or URLs to distribute. You and your guests simply go to *www.streamer.center* and login using a password protected user account, that's all it takes. And because it is a website, Streamer runs on laptops, tablets, MacBooks, iPads, iPhones, Android phones, Chromebooks and more. Use it anytime, anywhere, and with most any language.
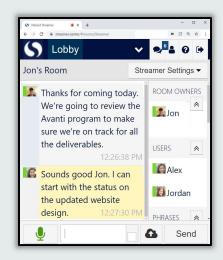

Streamer™ Rooms and User Accounts

Your conversations occur within a secure Streamer room. This is a virtual online room that is fully encrypted in all directions. You can use your room(s) as often as you like, with as many people as you want, with no limitations. Each person accesses a room using a password protected user account. User accounts are completely free, you can create as many as desired, and you alone control which accounts can access your room(s) along with their usage permissions.

Removing Language Barriers

Streamer goes way beyond simple bi-directional translation to provide complete multi-lingual synchronized spoken translation of whatever anyone is saying or typing in most any language. Now you can translate meetings and conversations where multiple languages are being spoken.

And There's More

With Streamer™ you can send documents, pictures, and private messages to others, and use it to caption all conversations including Zoom™, Teams™, Skype™ and other livestreaming platforms. These are just a few of the many features included with your Streamer subscription. To learn more, go to *https://streamerlink.cc/features*.

Private and Secure Captioning and Translation

Unlike free apps, where your conversations are recorded, archived, and potentially sold to others, with Streamer™ your data is private and secure. We do not store audio recordings or share your transcripts with anyone, ever. You alone control all access, and when you clear your transcripts they are gone forever. These are just a few of the many ways in which Streamer™ is fully compliant with privacy laws.

Budget Friendly

With Streamer™ you only pay one flat fee for your rooms. There are no per user, per minute or per session fees, nor any usage limits.

Creating Your Own Streamer System is Easy

It takes less than a minute to configure a Streamer system for your school, workplace, agency, church or one for your own use. To get started with a free 30-day trial, go to *www.streamer.center* and click on the *More Information* link.
