**Yes, you can.®**

***“This chair has no limits. It feels like an extension of me, allowing me to take control of my life and embrace new experiences.”***

***- Richard Peters***

## The latest addition to the family

Over the past 10 years, the Action range of chairs have been a symbol of quality, reliability and exceptional performance for many users and after 5 years in development, we are pleased to introduce the new award winning MyOn<sup>HC</sup> to the family.

Ideal for the more active users who want to take control and live life to the full, the MyOn<sup>HC</sup> is an extension of you and your **personality**, ensuring you lead an **active life** in a chair you can rely on.

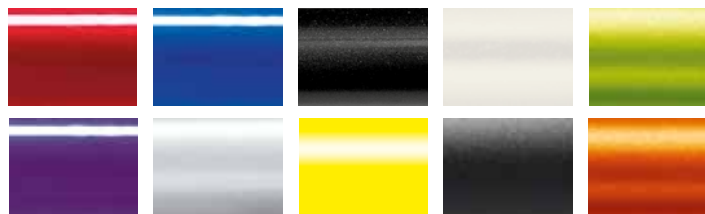

For those looking for **good driving performance** with easy handling, storage and transportation, this new chair with its **two patents** and lightweight construction is the chair for you.

## Make it personal

Giving you the freedom to **design the chair around your personality**, there are a variety of colours available to choose from.

Select from a choice of colour options for the frame...

...as well as 3 colour accents.

But why stop there?

# Customise the chair to suit you

The MyOn<sup>HC</sup> allows you to **configure the chair to you**, starting from selecting a more active look with the fixed frame, or alternatively the swing away version for even easier folding and transportation.

## Range of leg rest options

Including 70, 80 or 90 degree legrests, angle adjustable and an amputee support.

## Swing away & removable armrests

The easy release lever assists with transfers and the simple screw setting allows the position of the armrest to be fixed for easy access when flipped backwards.

## Seat pocket underneath

A handy pocket for your phone or keys is included with the depth adjustable upholstery seat.

**Light weight mudguard**

The stylish mudguards are lightweight, keeping the overall weight of the chair to a minimum.

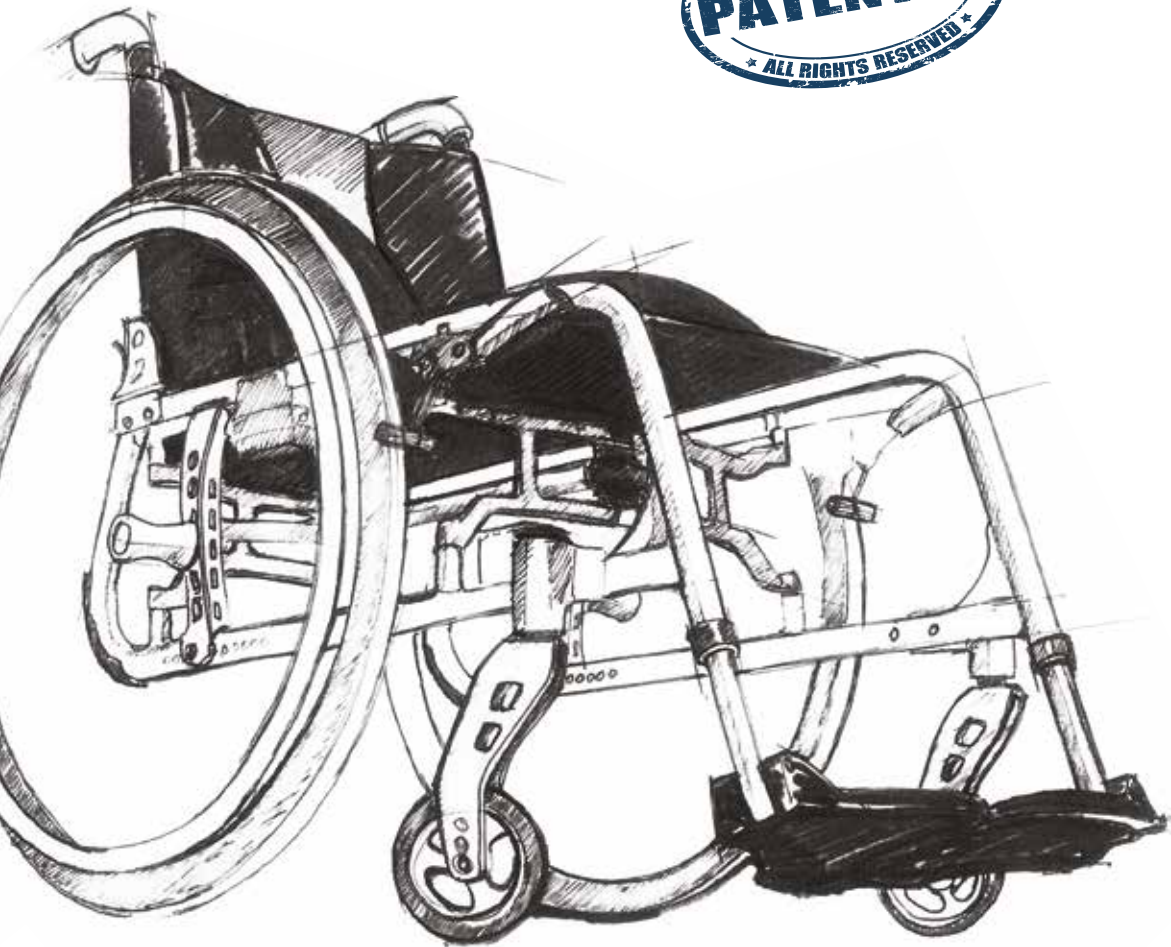

**Backrest cover**

The cover includes a pocket as standard along with a reflective strip for safety.

**Lightweight wheels**

Offer a sporty and stylish look. Available from 4" to 7" including the aluminium soft roll option.

## A stable, effortless drive

The unique H-shaped folding mechanism on the MyOn<sup>HC</sup> has a secure self-locking function, designed to **enhance your driving performance** and provide a more comfortable, smooth driving experience. The **added stability** built into this chair means less effort is required when you propel.

## Extremely compact when folded

This innovative folding mechanism then allows the backrest to fold on top of the seat and for the frame to greatly reduce in size, making it ideal for the more active user who wants a **lightweight chair** for **easy handling, storage and transportation.**

## A chair that fits you

The specially designed seat rail allows for **quick and easy step-less adjustments** to be made to the armrest, brake and backrest position. The backrest can be **adjusted whilst you remain in the chair** saving time during assessments and reduces the need for you to transfer in and out of your chair.

## Don't compromise on quality and style

The award winning Invacare MyOn<sup>HC</sup> can be configured and personalised to suit you and your lifestyle.

It is also **cross compatible** with other members of the Invacare range including the Alber power add on range, offering additional configurability options.

The **high level of quality and detail** in the MyOn<sup>HC</sup> allows the chair to **combine complex design with sophistication and style**, giving you a wheelchair to be proud of.

Invacare MyOn<sup>HC</sup>...**the perfect fit for your lifestyle!**

All our products are in compliance with EN 12183. In addition, our wheelchairs comply with ISO 7176-19 standards and with ISO 10542, and have additional features providing increased levels of occupant security and safety whilst travelling in a motor vehicle. Wheelchair users should however transfer to the vehicle seat and use the vehicle installed restraint system whenever it is feasible. For more pre-sales information about this wheelchair, please consult the [www.invacare.eu.com](http://www.invacare.eu.com) website. For information about typical user description, intended use, adjustments and transportation, please refer to the user guide.
