A comfortable pediatric positioning push-chair which accomodates the child's growth

technical features

► Two components: closed frame and seat with adjustable dimensions (width, depth) in order to normalize incorrect postural alignments.

► Seat with three recline positions from 5; to 20; in both directions. Hold the seat and use your foot to lock and unlock the adjustment mechanism. This is a great safety for the child.

► Seat with quick release mechanism frame attachment, facing forwards with recline seat, backrest and footrest.

► Seat in the rear facing configuration to have a complete control and interaction with the child.
