

# Pliko

Folding buggy for outdoor use

For children from 2 to 8 years  
Maximum load 25 kg - Single size

Pliko headrest  
is height adjustable

Folding buggy with extremely simple and fluid closure system, ideal for outdoor use for children from 2 to 8 years of age.

Its modern, light and practical look (even with its maximum load of 25 kg) conceals some features that are required for customisation, even for posture: the special padding allows the insertion of pads and wedges at the points where the child requires support and containment.

Pliko is equipped with belts for containment of the trunk and pelvis, with a quick locking system, to prevent slippage and maintain the child in a stable and secure position.

The frame is made of aluminium, lightweight and very durable, perfect for everyday use.

Pliko can be complemented by various functional accessories, such as rain capes and soft foot muff winter covers that keep the child feeling warm and protected even during the worst weather!

## Advantages

Strong and agile frame even under maximum load, foldable in one move, lightweight (only 9 kg) and practical for storing in the back of the car.

It is covered with a soft and comfortable pad, made with breathable fabrics and easily washable, available in various colours.

Pliko allows good posture thanks to its practical belts, adjustable headrest and the ability to place wedges under the padding wherever it is most needed. The seat is adjustable for depth and lateral support and the footrest is adjustable for height and flexion-extension.

### Fumagalli wears Peg Perego!

Fumagalli has formed a partnership with Peg Perego to create a fast and agile buggy, able to carry even children with special needs: the high-tech structure from Peg Perego, folding in one move, is complemented with a seating system from Fumagalli, soft and cosy, with all the fittings necessary to give your child proper containment and a feeling of safety.

... out for a stroll in the colder months  
with Pliko and the foot muff,  
warm and comfortable!

# Pliko step by step

- 1 The chassis includes postural containment systems to support the child and give a comfortable and safe feeling when out and about.
- 2 The backrest can be reclined all the way to a lying position for a nap or a rest, and a headrest can be positioned on it at different heights, using a hook and loop system.
- 3 The seat is adjustable for depth with a quick and practical system.
- 4 The side supports for the pelvis are padded and very soft, and can be further customised with the inclusion of additional padding which increases containment.
- 5 Belts for containment of the trunk and pelvis, easy to open and close, can be adjusted while the child is sitting, preventing slippage of the pelvis and trunk.
- 6 Comfortable padding, breathable and washable, carefully designed with fabrics and inserts that are functional and practical for the parent who has to deal with it every day.
- 7 Footrest adjustable for height and flexion-extension of the foot, easily removable.
- 8 Smooth running wheels, equipped with central brake; the front wheels are pivoting but, when necessary, may be fixed to walk in a more safe and stable way.
- 9 Quick and simple locking system, easy to carry without hindering the mother's movement.

## Recline to a lying position for the child to rest
