Easy = Safe

The solution for personal mobility

Concept

Easy = Safe is a new concept in transportation of wheelchair users, especially for private transport and small Taxis, where space is limited and traditional solutions represent a big compromise in terms of comfort and usability.

In order to maximize safety we have developed a new System, which improves care giver's inclination to a correct use of all the safety devices.

Thanks to its long time experience in vehicle conversion, and along with the unique features of the innovative Fiorella Lift, Focaccia Group can provide **Easy = Safe** solutions on a wide range of vehicles.

The caregiver doesn't need to get in and out the vehicle and the whole operation is effortless and risk-free.

IT'S EASY, IT'S SAFE!

Criteria

To be **Easy = Safe**, a system should comply with the following criteria.

1

Lifting and tie-down operation should be made by a caregiver who operates from outside of the vehicle.

2

An **Easy = Safe** System always have an Emergency Exit available.

3

The System is designed to minimize mistake possibility when using the safety devices.

4

The System guarantees maximum safety and comfort for both the caregiver and the wheelchair user.

5

Total time for lifting and tie-down is below 3 minutes.

In practice

Front tie down of the wheelchair is made before lifting it up, maximizing comfort for the caregiver and safety for the wheelchair user

Also the 3-point belt can be worn standing outside the car: safety has never been so easy!

The Fiorella Lift equipped with F-Twister option eases rear access to the vehicle, in order to perform rear tie-down from a comfortable and safe position.
