

OPAIR

Wheelchair bike

The OPair is a wheelchair bike with which you can transport a wheelchair user. A seat for the wheelchair user/passenger is affixed to the front of the bike. From behind, the cyclist has an overview of the road and view on the passenger. On the split frame version, the front part is easy to remove from the cycling component, which enables use as a wheelchair on location. The slightly angled front wheels provide increased driving comfort and stability. The depth adjustable seat of the OPair can be set to the passenger's measurements as well as the angle adjustable back rest and expandable side rests. The bike can be altered completely with a variety of options, you can find them on the options page on our website. For example, you can choose an electric motor which provides support while cycling.

SUITABLE FOR:

Cycling with children or adults who cannot cycle on their own due to disability.

TECHNICAL SPECIFICATIONS

Inside leg length	80 - 95 cm
Frame height	52 cm
Cycle weight	+/- 58 kg
